

IRENE PETER-OKON IDARA

Backend Engineer

1ireneokon@gmail.com | +234 907 434 2716 | github.com/1-dara

PROFESSIONAL SUMMARY

Backend engineer with hands-on experience designing, building, and deploying RESTful APIs using Python and FastAPI. Background includes two years of IT support and QA engineering experience, providing a strong foundation in systems troubleshooting, testing methodology, and quality assurance. Has independently designed and deployed three full-scale backend projects covering real estate listings, inventory management, and e-learning, each featuring JWT authentication, role-based access control, relational database design, and cloud deployment. Comfortable working across the stack with PostgreSQL, SQLAlchemy, and Alembic, and currently expanding into Node.js and TypeScript.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript (basic), TypeScript
 - **Frameworks:** FastAPI, Node.js
 - **Databases:** PostgreSQL, SQLAlchemy (Async ORM)
 - **Authentication:** JWT, OAuth2, bcrypt password hashing
 - **Tools & DevOps:** Git, GitHub, Alembic, Postman, VS Code
 - **Cloud & Storage:** Render, Cloudinary
 - **Concepts:** REST API design, role-based access control, database migrations, pagination, API testing
 - **Frontend:** HTML, CSS, basic JavaScript
-

PROJECTS

Real Estate Listing API — github.com/1-dara/real-estate-api

- Designed and deployed a REST API for property listings with JWT authentication and role-based access separating agents from regular users
- Built property CRUD operations with search, filtering by city/price/bedrooms/type, and pagination
- Implemented a reviews system with business rules preventing duplicate and self-reviews
- Integrated Cloudinary for image storage and managed schema migrations with Alembic

Inventory Management API — github.com/1-dara/inventory-api

- Built a retail inventory backend with admin and staff role separation
- Implemented product, category, and supplier management with full stock movement audit trails
- Developed automatic stock deduction on sales with price snapshotting for historical accuracy
- Created a low-stock alert endpoint for inventory monitoring

Learning Management System API — github.com/1-dara/lms-api

- Built an LMS backend supporting courses, lessons, and enrollments with role-based access for admins, instructors, and students
- Integrated Cloudinary for media uploads and designed relational schemas for course management
- Implemented JWT-based authentication across all endpoints

WORK EXPERIENCE

QA Engineer — Kinetech Digital Design | Feb 2025 – Apr 2026

- Sole QA covering manual testing across multiple web applications and websites
- Wrote test cases and test plans, and tracked defects through to resolution
- Performed API testing using Postman to validate endpoints and integrations

IT Support Specialist — Edgard Consulting Limited | Jan 2025 – Present

- Provided technical support including hardware troubleshooting, software installation, and system maintenance
- Managed network configurations and diagnosed connectivity issues
- Trained non-technical staff on software tools and documented technical processes

EDUCATION

B.Sc. Microbiology — Federal University of Lafia, Nasarawa State | 2021 – 2025
